DR. AHMED ABOEL AGHA

PROF. AHMED FAYEK

PROF. AHMED SABER

DR. DHAVAL A BAXI

PROF. HASSAN MORSY

PROF. HOSAM ABDELMAGED

PROF. MOHAMED ALI BEDAIWY

PROF. TAMER HOSNY

DR. WALEED AHMAD ALI

DR. YASSER ABOELWAF

Topics

- When Energy Goes Wrong: Case-Based Complications
- Safety Protocols & Thermal Spread Prevention in Laparoscopy
- Energy Failure & Troubleshooting
- Laser Energy in Low-Resource Settings
- Navigating a frozen pelvis
- Managing uterine artery in big uterus
- Best vessel sealer

Topics

- Energy Resources: Physics, Molecular Effects & Clinical Consequences
- Hostile Abdomen: Endometriosis & PID – Monopolar, ultrasonic, or Cold Cut?
- Uterine Artery in a Big Uterus: Vessel Sealer vs Bipolar Coagulation
- Advanced bipolar in pelvic side wall dissection
- Energy in Reconstructive Pelvic Surgery: Enemy or Friend?
- The Great Device Debate: Is a Vessel Sealer Always the Best Choice?
- The Ovarian Cyst: To Use Energy or Not?
- Conclusion and closing remarks

IVF Deep Dive Workshop

IVF Deep Dive: Real Science, Real Cases, Real Solutions

FACULTY

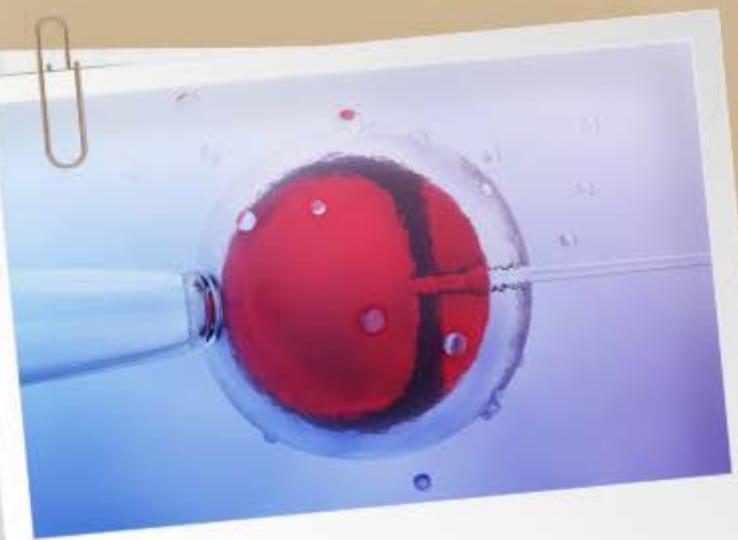

PROF. JOHAN SMITZ

Join the world's leading pioneers in reproductive medicine—Dr. Johan Smitz for a high-impact, workshop dedicated to In-Vitro Maturation (IVM). This exclusive session will bring together embryologists, reproductive endocrinologists, IVF specialists, and researchers seeking cutting-edge skills in oocyte maturation, culture techniques, and clinical application of IVM in modern assisted reproduction.

Objectives

By the end of this workshop, participants will be able to:

- Understand the biology and physiology of oocyte maturation
- Master practical steps and culture systems used in IVM
- Evaluate patient selection criteria
- Integrate IVM within modern IVF protocols
- Troubleshoot lab challenges and improve outcomes
- Review current evidence, safety data, and clinical success rates

•Obstetrics Ultrasound•

PROF. HASSAN JAAFAR

PROF. HESHAM ELCAMMAL

PROF. HISHAM MARGHANI

PROF. MOHAMED ABOELLAIL

PROF. MOHAMED KAMAL

PROF. MOSTAFA HUSSEIN

DR. TAMER FARID

Topics

- First trimester anomaly scan
- Midtrimester anomaly scan: System by system
- third trimester scan: indications & limitations
- Fetal Doppler
- Multiple pregnancy: How to manage
- Common encountered anomalies in daily practice
- Case scenarios

PROF. KHALID KHAN

Former Chief Editor, BJOG

PROF. BASSEL WATTAR

Chief Editor, Human Fertility Journal

Aim

To familiarise and upskill workshop participants in scientific writing and peer review.

Objectives

To prepare workshop participants to:

- **A:** Learn how to select the right journal and engage with its editorial assessment and peer review
- **B:** Develop an approach to using reporting guidelines to facilitate appraisal and application of research evidence concerning medical testing and therapy using primary research and systematic reviews (meta-analysis)
- **C:** Write a coherent manuscript and undertake its peer review.

Note

please remember to bring your laptop as it will be essential for the practical segments of the session.

timetable

Introduction

SESSION (1)

Selecting a journal Precourse assessment

The basic journal metrics

Small group 1: Reporting guidelines (CONSORT, ACCORD, and PRIOR)

SESSION (2)

Write the title and abstract first

Writing for publication vs evidence-based medicine

Small group 2: Framing questions and drafting succinct abstracts and introductions

SESSION (3)

Avoiding rejection by knowing what editors want

The editorial and peer-review process

Small group 3: Writing methods and results

SESSION (4)

Handling revisions

Lecture 4: Responding to peer review

Small group 4: Writing discussion

SESSION (5)

Post-publication critique

Lecture 5: Post-publication dissemination

Small group 5: Responding to a comment

SESSION (6)

State of Art in 2026 *Workshop*

- Welcome and introduction to the day
- Evidence based evaluation of RPL
- Genetic Factors associated with RPL: Role of PGT-A
- Immune evaluation and management
- Management of Endocrine factors of RPL
- Impact of uterine contractility on IVF outcomes and embryo implantation
- Optimization of uterine cavity in patients with RPL
- Recurrent Implantation Failure Assessment: A practical Approach
- Asherman Syndrome and it's role in RPL
- Practical approach to RPL management: what does the evidence tell us?

★ How to design and execute ★ experiments and get it published

28 January 2026

Workshop

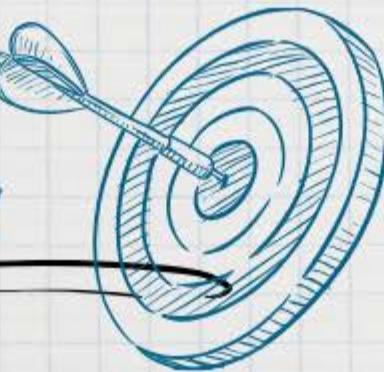

PROF. CHRISTOPHER BARRAT

Co-editor in Chief of Human Reproduction Journal

High-quality experimental research is the foundation of scientific advancement. However, many researchers struggle with designing robust experiments, executing them systematically, analyzing results properly, and packaging their findings for publication in reputable journals. This workshop provides a practical, step-by-step framework to help researchers transform ideas into publishable studies. It is suitable for early-career researchers, postgraduate students, and clinicians engaged in scientific research.

Aim

- 1- How to Design and Execute Experiments
- 2- How to get your paper published

Target Audience

- Postgraduate students
- (Master's and PhD)
- Early-career researchers
- Clinicians engaged in clinical or laboratory research
- Anyone interested in improving research quality and publication success

Objectives

By the end of the workshop, participants will be able to:

1. Formulate clear, testable research questions and hypotheses.
2. Design rigorous experimental protocols with appropriate controls.
3. Choose suitable study designs, sample sizes, and statistical approaches.
4. Implement experiments with reproducibility and ethical compliance in mind.
5. Manage data efficiently and identify sources of bias or error.
6. Interpret results and prepare manuscripts aligned with journal requirements.
7. Navigate the publication process, from journal selection to responding to reviewers.
